ČipinkoKlingáčik C4 — assembled baseline

100 × 85 mm carrier • socketed Pico-form-factor proxy • all baseline hand-fit parts shown

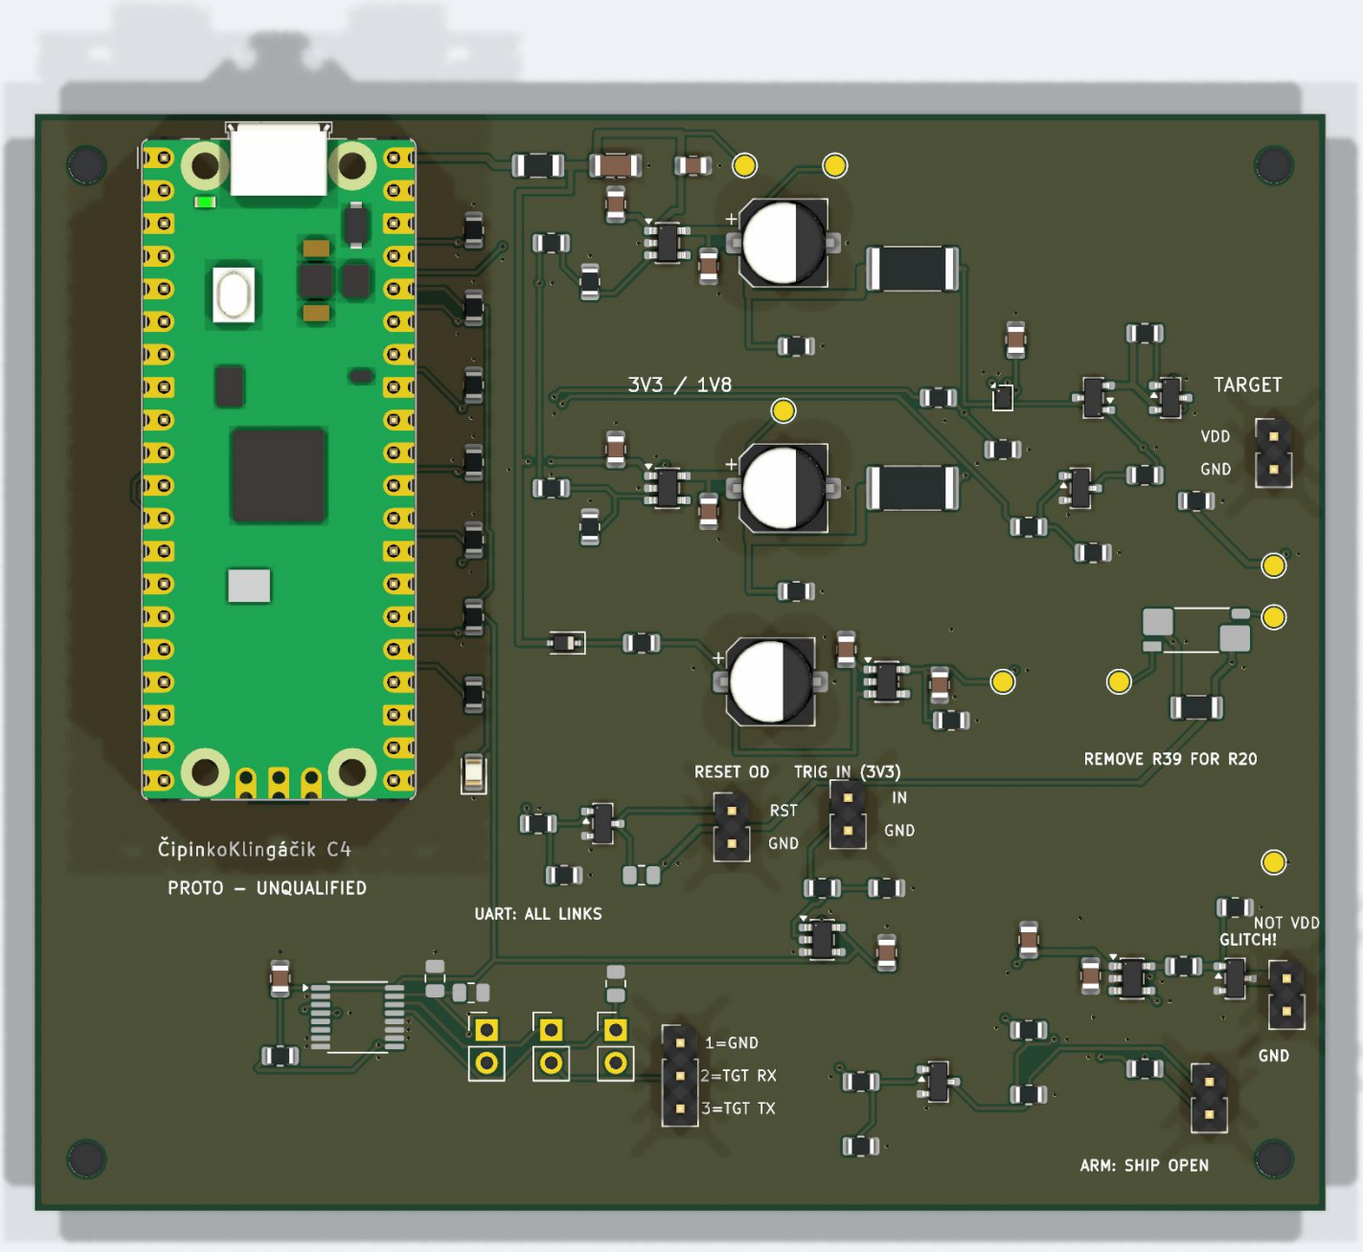

Generic component models • Pico 2 internals not exact • socket/header mating height illustrative

Illustrative CAD render • not a photograph or mechanical/production approval

ČipinkoKlingáčik C4 — top view

68 SMT parts + 7 hand-fit references • nine DNP options left empty • ARM open

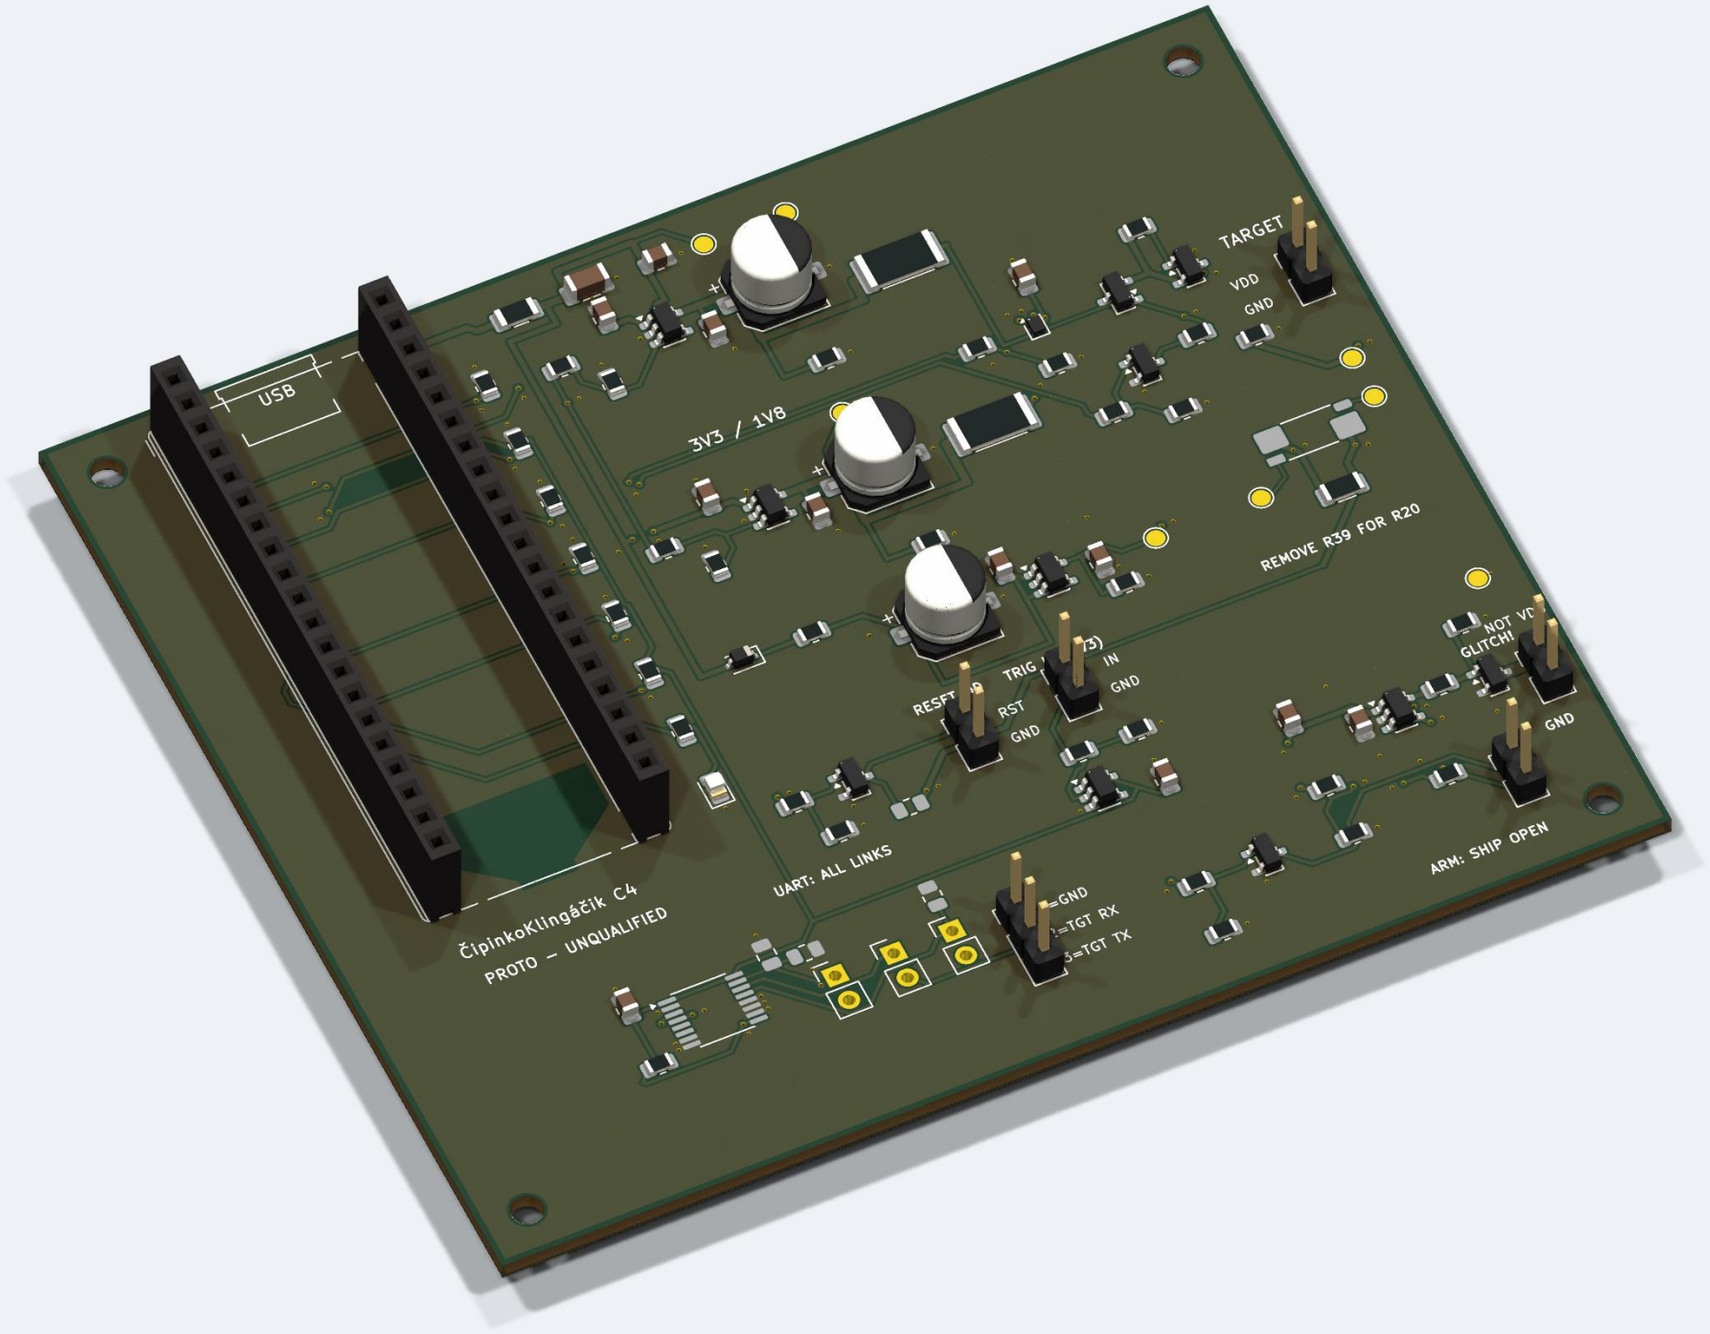

Generic component models • Pico 2 internals not exact • socket/header mating height illustrative

Illustrative CAD render • not a photograph or mechanical/production approval

ČipinkoKlingáčik C4 — module removed

Service view: two generic 1×20 sockets remain fitted • module unplugged, not a different BOM

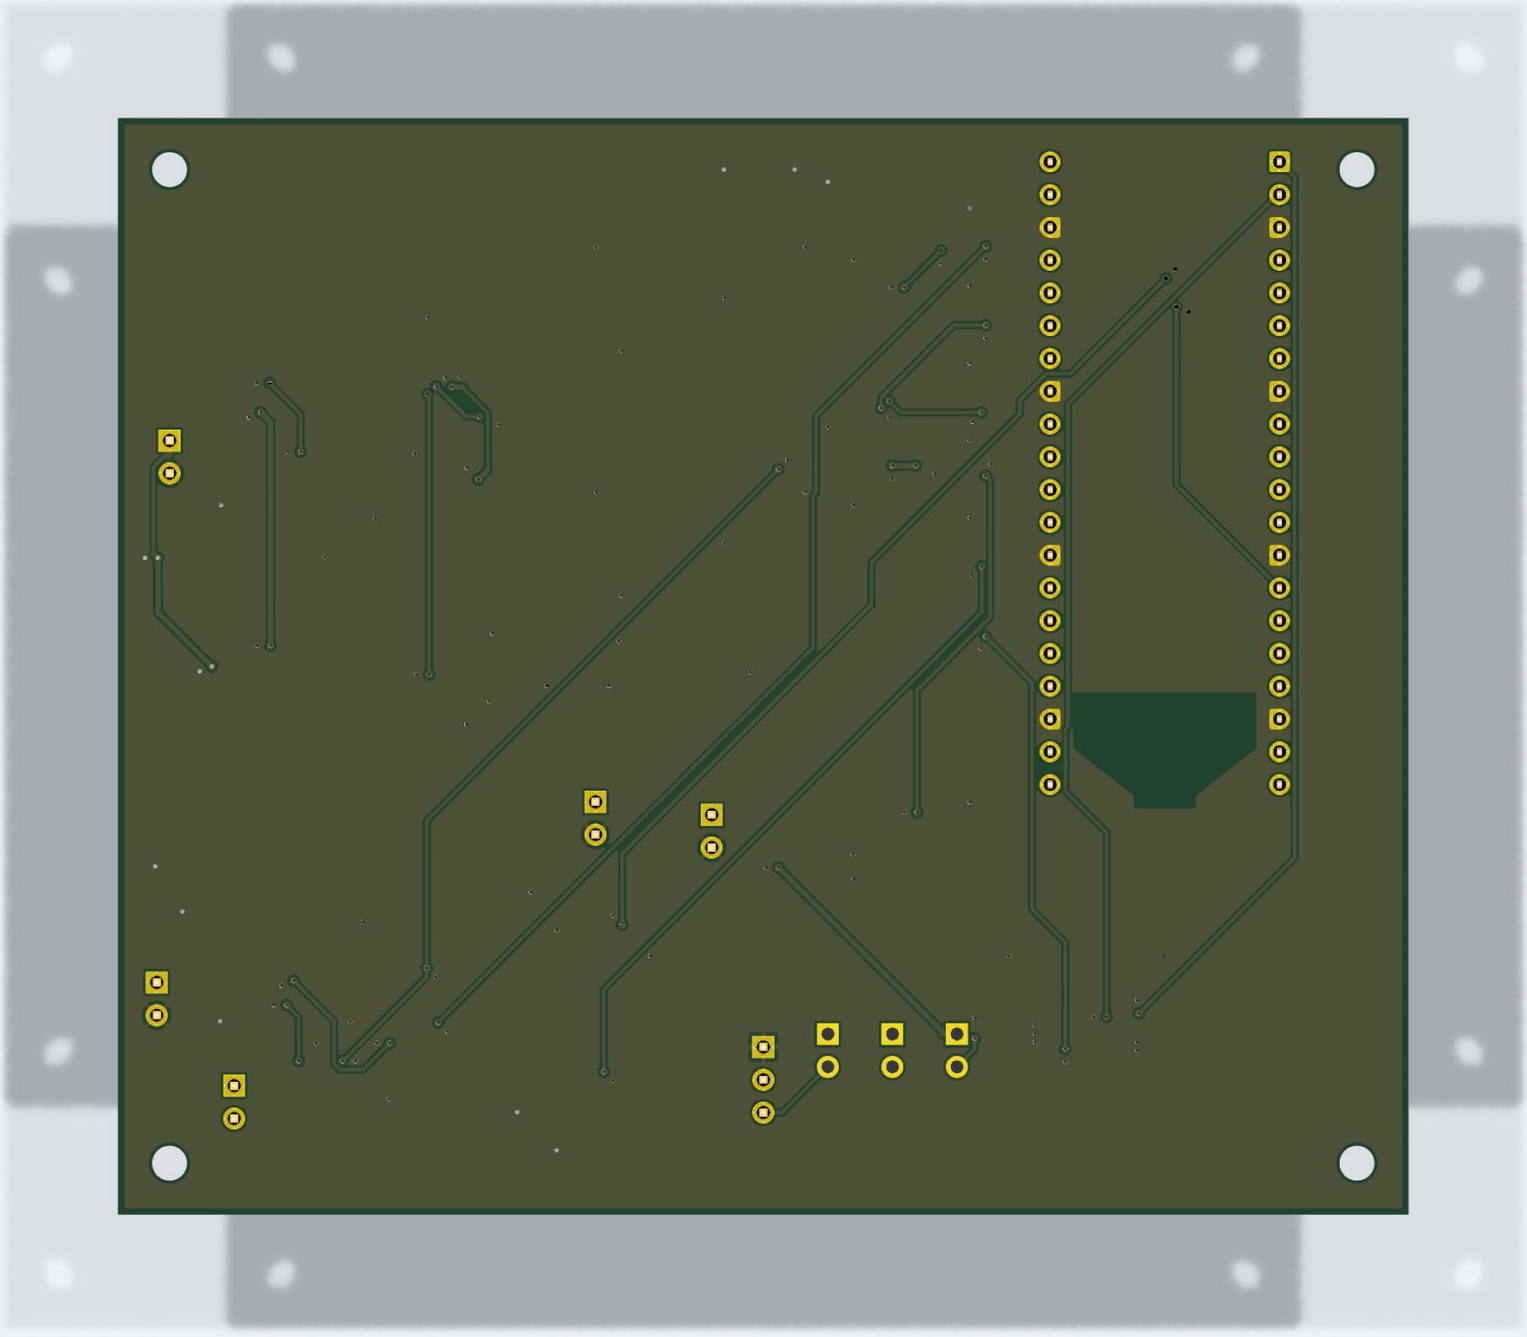

Generic component models • Pico 2 internals not exact • socket/header mating height illustrative

Illustrative CAD render • not a photograph or mechanical/production approval

ČipinkoKlingáčik C4 — underside

Viewed from below (mirrored versus top) • through-hole tails shown • no bottom-side SMT

Bare pads for unpopulated options are intentional • mounting screws/standoffs not shown

Illustrative CAD render • not a photograph or mechanical/production approval
